Introduction

Since our products could be downloaded as freeware from the Wilbur Graphics website, we have continued to expand the range of classic and modern railway stock for TS Classic. This release is the counterpart of the package with era IV carriages. In this bundle you will not only find four-axle carriages from the 1930s in their original green version with first, second and third classes, but also in their postwar NS blue livery, when the third class was abolished.

This release includes a complete range of WG passenger equipment that can be used in the period 1945-1965, which has been expanded for this occasion with representatives of the numerous C 6400 series, better known as the C12c. Carriage NS 6478, which is the only preserved example of 85 units and is currently being restored at the SGM, is also part of the release.

Importantly, all TS objects in this release are compatible with other Wilbur Graphics products, such as the Berkendam Route and the NS locomotives from the same period. Although the display names (which are shown as identification in the QuickDrive menu and in the Object Browser of the Scenario Editor) have been adjusted here and there, while their unique object IDs have remained unchanged.

This manual presents the complete range of carriages within the release, with rolling stock grouped by railway company, preceded by an index. The Dutch NS preload consists will be pulled by locos of series 2100, 3700 or 1100. In Bundesbahn rakes representatives of series 23 and V200 have been pressed into services. These engines are also part of the release, with the exception of the V200, which can be found in the Dovetail Games ELAP addon (European Loco and Assets Pack).

Installation tips

General

The *WG_Coaches_Era III* release by Wilbur Graphics has been made available as a .zip-file and contains, apart from a `Readme_EN.txt`, the following items:

- Folder `Manuals\Wilbur Graphics` with English, Dutch and German language manuals:

`WG_Coaches_EraIII_Manual_V1_2.pdf`
`WG_NS_1100_manual_EN_V1_41.pdf`
`WG_NS_2100_manual_V1_0.pdf`
`WG_NS_3700_manual_V2_1.pdf`
`WG_DB_BR_23_Manual_V2_2.pdf`

`WG_Rijtuigen_tp3_Handboek_V1_2.pdf`
`WG_NS_1100_handleiding_NL_V1_41.pdf`
`WG_NS_2100_handleiding_V1_0.pdf`
`WG_NS_3700_handleiding_V2_1.pdf`
`WG_DB_BR_23_Handleiding_V2_2.pdf`

`WG_Reisezugwagen_EpIII_Handbuch_V1_2.pdf`
`WG_NS_1100_handbuch_DE_V1_41.pdf`
`WG_NS_2100_Handbuch_V1_0.pdf`
`WG_NS_3700_Handbuch_V2_1.pdf`
`WG_DB_BR_23_Handbuch_V2_2.pdf`

- installer `WG_Coaches_tp3_V12_build_20250915.exe`

After launching the installer, you will be prompted to

- Select a language for the installer (Dutch/English/French/German)
- Accept the License Terms (EULA)

See the `release_notes.txt` for the latest changes and improvements.

Other tips

- The .zip file must be fully unpacked before you can begin the installation.
- If the installation software cannot find the Railworks folder on your system, the reference to this folder in the Windows registry may no longer be valid. This situation occurs if you have moved the Railworks environment to another computer or disk drive. You solve this by repeating the installation of Railworks from Steam.

Browser name index

Rolling stock in this release has been organized into three product folders under the TS Assets folder Wilbur Graphics, viz. Rolling mat, Rollmat_de and Rollmat_NS.

Preloads

The following consists are part of the release:

DB 23 076 with Loreley-Express

The young Bundesbahn managed to draw a lot of attention at home and abroad with these modern, Schürzenwagen. The carriages stood out because of their blue livery with white stripes and the name DEUTSCHE BUNDESBAHN in white capital letters.

DB 23 105 with Schürzenwagen

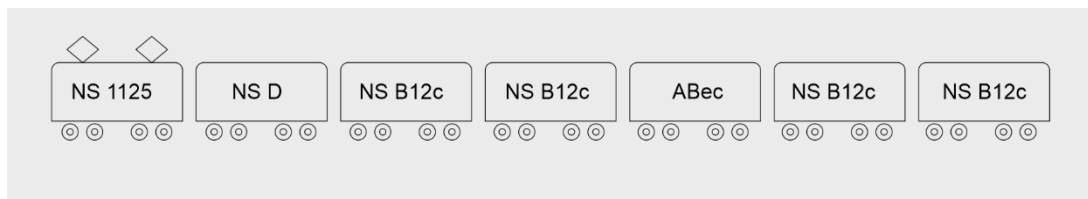

In the early fifties, the then still modern Schürzenwagen were used in domestic express train traffic over medium distances.

DB V200 with Loreley-Express

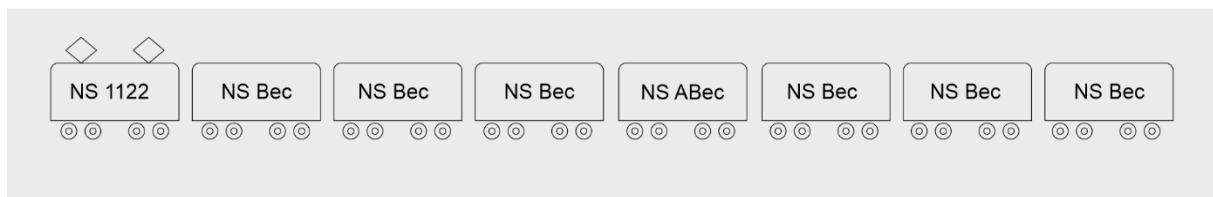

In addition to the BR23, the V200 was also used by the DB as a modern exponent of the postwar economic recovery (the locomotive is part of the European Loco & Assets Pack (ELAP) of DTG).

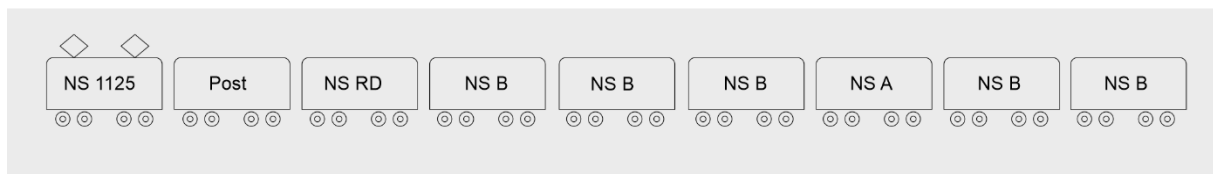

WG NS 1125 met sneltrein/with express passenger

After the abolition of the third class, the C12cs were upgraded to 2nd class carriages. In their new blue outfit for a number of years they could be found in inland service, e.g. behind an 1100 in domestic traffic of in leave trains.

WG NS 1122 tp3 m/w mat '24 stam/rake

When modern EMUs were entering service, Mat24 carriages became available, which were renumbered and painted blue. This type of consists were also pressed into service as leave trains.

WG NS 1125 tp3/era III m/w Plan E P.RD.AB.B

In the 1950s, the Dutch State Railways ordered a large series of Plan E type carriages for inland passenger services. Here a Plan E rake is pulled by an 1100.

WG NS 2135 Int. D-trein /Int. Express Service

Around 1950 the last HSM locomotives could also be observed in front of international express trains, as in this case with Dutch and German stock of prewar origin.

WG NS 2109 met/with Etoile du Nord

Many photos show a 2100 for the Etoile du Nord, known in the Netherlands as Noordster. This train service connected Amsterdam with the Gare du Nord in Paris.

WG NS 2126 met stoptrein/with passenger local

This train, which is composed of compartment cars, could also have run in this composition because the last wooden stock was taken out of service in 1956.

WG NS 2135 met sneltrein/with express passenger

Shortly before the Second World War, the railways had a series of D train carriages built that were intended for domestic traffic. In this rake of predominantly C12c stock, the better situated passenger could have taken a seat in the AB 7521.

WG NS 3737 era III / tp3 D-trein /express passenger service

As we know, the 3700 series also formed the backbone of Dutch steam traction in the 1950s. Here the type is pulling an international express train.

WG NS 3820 era III / tp3 stoptrein / local passenger service

In addition to a 3-door steel brake van, this train is completely composed of redundant Mat24 carriages, still in their original green color.
